Summary

Highly skilled and motivated professional with a strong background as a Senior Test Automation Engineer, now seeking to transition into a DevOps role. Possessing extensive experience in test automation frameworks, continuous integration, and software testing methodologies,

Technical Skills

Java	TestNG	Kubernetes
JavaScript	JUnit	Terraform
Selenium	Extent Report	Ansible
WebDriverIO	SQL	Docker
Appium	Postman	GIT
Maven	Jenkins	Nexus
Gradle	AWS	SonarQube
Rest Assured	Allure Report	Linux

Experience

Emirates
Senior Test Automation Engineer

April 2023 - Present
Dubai, United Arab Emirates

- Testing a new progressive web application from scrach built in React and .NET

- Conducted manual testing activities, including test case creation, execution, and defect tracking.

- Collaborated with the development team to understand project requirements and ensure test coverage.

- Analyzed business requirements, functional specifications, and design documents to identify test scenarios.

- Wrote clear and concise test cases that covered various system functionalities.

- Executed test cases and documented test results, including defects and their severity.

- Developing a web-based test automation framework utilizing WebDriverIO

- Simultaneously writing automated test cases in parallel with the ongoing development process.

- Integrated the automation framework seamlessly into the CI/CD (Continuous Integration/Continuous Deployment) pipeline, enabling automated testing as part of the software development lifecycle.

Vodafone Intelligent Solutions _VOIS
Senior Test Automation Engineer

May 2021 - March 2023
Cairo, Egypt

- Assumed the role of team leader, overseeing a team consisting of three testers.

- Reviewed test cases and provided guidance to the team throughout the software development lifecycle (SDLC).

- Develop and maintain robust test automation frameworks for web and API testing.

- Create and customize reusable boilerplate code for web and API automation, optimizing efficiency and consistency across projects.

- Collaborate with cross-functional teams to gather requirements and design test automation strategies.

- Identify and troubleshoot issues within test automation frameworks, providing timely resolutions to ensure smooth execution of automated tests.

- Continuously enhance test automation processes and methodologies, incorporating industry best practices.

- Mentor and provide technical guidance to junior members of the test automation team.

PrimeLab
Test Team Lead

December 2021 - May 2021
United States - Remotely

- Led and managed a team of manual testers, providing guidance and support throughout the software testing process.
- Conducted test case reviews and provided feedback to improve test coverage and effectiveness.
- Coordinated with cross-functional teams, including developers, business analysts, and project managers, to ensure alignment on testing objectives and timelines.
- Prioritized and assigned testing tasks to team members, monitoring progress and ensuring timely completion.
- Participated in project meetings and provided testing status updates, highlighting risks and proposing mitigation strategies.
- Acted as a point of contact for client communication regarding testing activities, addressing queries and providing regular updates.
- Assisted in the evaluation and selection of testing tools and technologies to optimize testing efficiency and effectiveness.

Vezeeta
Senior Software Quality Assurance Engineer

November 2019 - May 2021
Cairo, Egypt

- Assumed the role of team leader, overseeing a team consisting of four testers.
- Reviewed test cases and provided guidance to the team throughout the software development lifecycle (SDLC).
- Developed and implemented an automation test framework for web applications using Selenium WebDriver, ensuring efficient and reliable test automation.
- Designed and executed automated test cases, both for web applications using Selenium WebDriver and for APIs using Rest Assured, resulting in improved test coverage and efficiency.
- Maintained and updated the automated test cases to align with changes in software requirements and updates.
- Integrated the automation framework seamlessly into the CI/CD (Continuous Integration/Continuous Deployment) pipeline, enabling automated testing as part of the software development lifecycle.
- Conducted regular reviews and analysis of automated test results, identified and reported any issues or defects.
- Worked closely with developers and quality assurance teams to align automated testing efforts with overall project goals and objectives.

Vezeeta
Software Quality Assurance Engineer

Augest 2018 - November 2019
Cairo, Egypt

- Conducted manual testing activities, including test case creation, execution, and defect tracking.
- Collaborated with the development team to understand project requirements and ensure test coverage.
- Analyzed business requirements, functional specifications, and design documents to identify test scenarios.
- Wrote clear and concise test cases that covered various system functionalities.
- Executed test cases and documented test results, including defects and their severity.
- Participated in defect triage meetings and provided necessary information to assist in bug resolution.
- Verified bug fixes and conducted regression testing to ensure software stability.
- Assisted in the setup and configuration of test environments and test data.
- Participated in test plan and test strategy development.
- Collaborated with cross-functional teams to ensure smooth and timely delivery of high-quality software.
- Continuously improved testing processes and methodologies.
- Kept up-to-date with industry trends and emerging technologies related to software testing.
- Contributed to the overall quality assurance efforts and strove for excellence in software testing practices.
- Demonstrated strong attention to detail, analytical skills, and problem-solving abilities.
- Followed established testing standards and best practices to ensure consistent and reliable results.

Certifications

Certified Kubernetes Administrator (CKA)   Augest 2020

Certificate Code: LF2ksn97jls0

Certified AWS Solutions Architect - Associate

October 2021

Certificate Code: XDTY7NVBGJF11J3G

Certified ISTQB Agile Tester

January 2019

Certificate Code: 190122004

Certified ISTQB Foundation Level

April 2018

Certificate Code: 180403005

Education ## Modern Academy For Engineering and Technology

2012-2017

Bachelor of Engineering, Electronics and Telecommunication
GPA: 3.48/4 Excellent
